

## Our new thermal insulation material

- In order to ensure the quality of **EGF** Raw Material, we are now using the new thermal insulation material, which can guarantee the temperature keeps below 0°C in one week
- The new thermal insulation is called Stored Energy Ice Pack with non-toxicity
- In the meantime, we also add temperature recorder to see the change of temperature during the long transportation
- Obvious signals can be found on the external packing, please see the following signals.
