

## UV cure resin

### Property Index of UV cure resin:

Appearance: Viscous, flowable

Color: clear transparent

Density: 1.05(g/cm<sup>3</sup>)

Viscosity: 17-19pa.s(23°C)

Functionality: 2

Formula Weight: 2700

### Package:

25kg / plastic barrel and 200kg / steel barrel with inner plastic or plastic barrel.

Introduction of UV-curable resin:

This product is a two functional aliphatic polyurethane acrylic resin, low viscosity, clear transparent. As a UV cure resin, after curing soft, excellent resistance to become yellow,

Can be used for high-grade UV-curing coatings, UV-curing inks, for assisted resin of

UV-curing varnish, outdoor UV curing coatings, plastic UV-curing inks, UV-curing inks and so on, can also be used as heat-curing resin and modified resin.
