

Merchandise Name 2,3,5-Trichloropyridine
CAS Registry Number 16063-70-0
EINECS 407-270-2

Molecular Structure

Molecular Formula C₅H₂Cl₃N
Molecular Weight 182.44

Density: 1.539g/cm³
Melting point 46-50°C
Boiling Point: 219°C
Flash Point: >110°C
Stability: Stable under normal temperatures and pressures.

Hazard Symbols

Risk Codes R22;R36/37/38
Safety Description S26;S37/39
Refractive index: 1.572

Appearance: clear to yellowish liquid

Assay(GC) ≥ 99.0 %

Moisture ≤ 0.1 %

Packing Group III

Transport Information UN 2811

Transport packing: 200kgs steel drum.

Storage Precautions: Avoid release to the environment. Refer to special instructions / safety data sheets.
